G13. MEASURED RATE SERVICES

13.1 BUSINESS MEASURED RATE SERVICE

(N)

Business Measured Rate Service is a telephone service with local service charges based upon the number of outgoing timed or untimed local messages or Zone Usage Measurement Service Zone 1 and Zone 2 messages applicable to business service.

13.1.1 TERMS AND CONDITIONS

A. All terms and conditions relating to the individual service offerings found in this tariff schedule as specified on the list of services (g3. Preceding) can be found in the tariff schedule indicated next to that service. All of these terms and conditions are applicable to the provisions of service from this tariff.

B. All rates and charges may be adjusted at a later date.

C. REGULATIONS

1. The length of conversation to which usage rates apply is determined by the time of day and day of the week as shown in D. following.

The time of day when conversation actually takes place is determined in accordance with the time system - Standard or Day Light Saving, legally or commonly in use, determines whether Day Rate, Evening Rate, or Night and Weekend Rate treatment applies. In cases where a call extends beyond one rate period, the appropriate treatment applies to the respective periods of conversation.

2. Business organizations which transmit messages for the deaf may subscribe to untimed business measured rate individual lines up to the number of in service teletype machines at each business location equipped for this purpose. Such businesses must furnish evidence, acceptable to the Utility, of furnishing this service for the deaf in order to qualify for untimed service.

3. Customers may transport analog data over basic telephone lines. The Utility will support low speed analog transmission of data (up to 4800 bps) over regular access lines.

4. Deaf Surcharge

In addition to the rates and charges contained herein, a monthly rate equal to the amount shown in Schedule Cal.P.U.C. No. A5.2.3. applies.
