Sources: Broadband deployment data is collected from Internet Service Providers and validated by the California Public Utilities Commission. The FCC defines broadband as Internet access services with downstream or upstream speeds greater than 200 Kbps in at least one direction. Such service is considered deployed if an ISP can provision new requests for service within 10 business days. Speeds of at least 6 Mbps downstream AND 1 Mbps upstream are considered served for purposes of the California Advanced Services Fund Infrastructure Grant Program.

Household data is based on the California Department of Finance, January 1, 2018 estimate.

¹FCC CAF II CAM 4.3 model supported Census Blocks and FCC CAF II Auction 903 public results Census Blocks are considered served.

²Dial-up only service is included in the "No Service" category.

Sources: Broadband deployment data is collected from Internet Service Providers and validated by the California Public Utilities Commission. The FCC defines broadband as Internet access services with downstream or upstream speeds greater than 200 Kbps in at least one direction. Such service is considered deployed if an ISP can provision new requests for service within 10 business days. Speeds of at least 6 Mbps downstream AND 1 Mbps upstream are considered served for purposes of the California Advanced Services Fund Infrastructure Grant Program. Household data is based on the California Department of Finance, January 1, 2018 estimate.

¹FCC CAF II CAM 4.3 model supported Census Blocks and FCC CAF II Auction 903 public results Census Blocks are considered served.

²Dial-up only service is included in the "No Service" category.

³A project of the Gold Country BB Consortium. Not included in the California total. T-17550.

⁴Under Resolution T-17550 - ESCRBC maintains a three-county region even though responsibility for broadband development in Inyo and Mono counties is currently being managed by a sub-regional consortium, the Inyo Mono Broadband Consortium.
