Broadband availability data collected from Internet Service Providers and validated by the California Public Utilities Commission. The CPUC defines "broadband service" as Internet connectivity with download / upload speeds of at least 768 Kbps / 200 Kbps. Such service is considered "available" if the provider can provision new requests for service within 10 business days.

Household data is based on the California Department of Finance, January 1, 2017 estimate.

²Dial-up service is subsumed in the no service category
