Broadband availability data collected by the California Public Utilities Commission pursuant to the NTIA's State Broadband Initiative. The NTIA defines "broadband service" as Internet connectivity with download / upload speeds of at least 768 Kbps / 200 Kbps. Such service is considered "available" if the provider can provision new requests for service within 10 business days. "Fixed broadband" consists of service provided using wireline or fixed wireless technologies.

Satellite subscription data from FCC Form 477 as of June 2012.

Household data from the California Department of Finance, January 1, 2013 estimate.
