Overview of the FCC's CAF II program

Build-Out Commitment over a 5 year period

- 40% coverage in each state by end of 2017
- 60% by 2018, 80% by 2019, 100% by 2020
- Need to be able to provide service within 10 days of order
- Minimum 10Mbps downstream & 1Mbps upstream
- 170GB monthly usage required
- In California, AT&T will use the CAF II support to offer high-speed Internet access to more than 141,000 homes and small businesses in the FCC-specified census blocks.
- AT&T FWI service will support speeds of at least 10 Mbps download and 1 Mbps upload.
- AT&T's Fixed Wireless Internet is a service that uses a fixed-wireless "last mile" connection between the fiber at a cell tower and the customer premises to provide high-speed Internet access.

Majority of AT&T's CAF II deployment is through Fixed Wireless Internet

- Fixed Wireless Internet (FWI) is a service that uses a fixed-wireless "last mile" connection between the fiber at a cell tower and the customer premises to provide high-speed Internet access.
- This service supports speeds of at least 10 Mbps download and 1 Mbps upload.
- Customers will also have the ability to bundle DirecTV video services and/or AT&T postpaid wireless services seamlessly with AT&T Fixed Wireless Internet.
- Current pricing is \$50-\$70/month depending on bundling. Lifeline discount available for eligible customers.
- The service will require the installation of a small wireless antenna at the customer premise that will connect to a wireless router in the home.
- Cell coverage expansion concurrent with the FWI build, AT&T Mobility Coverage will be expanded in many areas.

AT&T Fixed Wireless Internet[™] Overview

Note: Illustrative only and not to scale. While the expectation is most locations will be served via FWI, AT&T may serve required locations via other technologies

How does it work?

- Using LTE, Band 30 (WCS-2.3Ghz Spectrum)
- Outdoor antenna connecting to wireless network
- In-home experience just like any Internet service

AT&T Traditional Service Territory

CAFII Supported Area

ATET CAF II Build Progress in California:

Locations Reached by CAF II Build as of EOY-2017

- The majority of these living units are reached by fixed wireless technology
- Initial build in 2017 focused on areas where FWI could be added to existing cell sites
- Build in 2018 and beyond relies on new site builds and associated permitting
