

Hunter Communications Inc. CASF Broadband Infrastructure Grant Application

Project Summary

Applicant's Name:	Hunter Communications Inc.
CPCN/U:	U-7281-C
Project Title:	Mendocino County Project 1
Named Project Location:	Mendocino County Round Valley/Covelo/Dos Rios, Laytonville, Willits, Hopland, Ukiah, Talmage, Calpella, Redwood Valley, Yorkville, and Potter Valley and surrounding areas
Project Type:	Last Mile
CASF Grant Funding Request:	\$290,327,940
Project Cost:	\$290,327,940
Contact Person:	Keith Grunberg, Director of Business Services 801 Enterprise Drive Center Point, OR 97502 Mobile: (503) 819-7885 Fax: (541) 727-3066 kgrunberg@hunterfiber.com

UNSERVED HOUSEHOLDS INCLUDED IN GRANT REQUEST

COMMUNITY	CASF ELIGIBLE HOUSEHOLDS-TARGETED
COVELO	970
HOPLAND	515
LAYTONVILLE	790
WILLITS	1,466
UKIAH	1,084

TALMAGE	19
CALPELLA	63
REDWOOD VALLEY	480
POTTER VALLEY	483
TOTAL	5,870
Speed Mbps Offered	The maximum Mbps downstream and upstream speed currently offered to households Under 6Mbps downstream and 1Mbps upstream.
Median Household Income	With a total weighted average median Household Income of \$46,552
Estimated Number of Businesses, anchors and Public safety locations:	<p>There are 24 anchor institutions, schools and health facilities that could benefit with new services or improved speeds. We have not included public safety until we sort out how this all works with the FirstNet initiative.</p> <p>Eighty-two (82%) of the 5,000 businesses in the County have nine (9) or fewer employees. We are working with the West Company Business Center to identify the businesses in the nine community areas.</p>
<p>Description of major infrastructure to be deployed:</p> <p>The project provides high-speed Internet, delivered over fiber optic cable to 5,870 premises (Households-HHs) in nine communities and surrounding areas including: Round Valley/Covelo/Dos Rios, Laytonville, Willits, Hopland, Ukiah, Talmage, Calpella, Redwood Valley and Potter Valley. A total of 919.56 miles of 100% underground fiber routes are being deployed across these nine areas creating a seamless distribution system, consisting of core arteries and distribution, last-mile and drops which we will collectively refer to as "Last-Mile" for the remainder of the document. The last-mile fiber drops to at least 90% of the 5870 (5283) households, at an average of 300 feet per household, adds another 300 miles. This includes three Central Offices for backhaul which 3 Huts will be for fiber aggregation. Plans are to construct 15 remote XPON cabinets and 12 fixed wireless towers for WiFi access and space for WISP/Wireless for Carrier access.</p>	

Also, there are twelve (12) locations, one in each community, where stand-alone towers are being placed to provide fixed wireless access, via WISPs, to reach up to 10% of the outlying households, or 587.

The fiber design calls for deploying as much fiber underground as possible to preserve infrastructure during wildfires and other unforeseen disasters. According to an assessment by Magellan Advisors for Napa County 30 percent of the telecommunications infrastructure was damaged by the 2017 wildfires. None of the underground infrastructure was damaged.

Breakdown of Aerial and Underground installation:	Ninety (90%) percent of the Households, 5283, are estimated to be connected via underground fiber installation and up to Ten (10%) percent, 587 households, via fixed wireless, pending more detailed design after the grant award.
Major Equipment Expenses	Major equipment expenses from Nokia/Ciena Juniper/META will include: 12 Wireless Stand-alone Towers 72 Wireless Antennas 7 Shelters (12' x 20") 6 Backup Generators 20 144 Fiber Termination Panels with Connectors 1 Media Gateway with TDM Capability 1 VM Stack for EAS, MV, N Series and SAS 7 Core Routers 4 10 Gbps Optical Transmit/Rcvrs w/4" ROADMs 15 Edge Routers 15 GPON Cabinets 330 XPON OLT Ports 245 XPON OLCs 1321 XPON Splitters 1321 Hand Holes/Pull Boxes 5870 XPON ONTs w/Router, Battery 587 Wireless HH Antennas and Radios 1219 Miles of Conduit and 144 ct Fiber 4888 Vaults and Splice Cases 4855 Pull Boxes
Estimated construction timeline:	The deployment schedule assumes a start date of January, 2021 and a completion date of June, 2025, or a total of 42 months from start to finish, including time to process all necessary permits.

Description of proposed broadband project plan:

The Hunter fiber approach is to provide up to 1 Gbps symmetrical Internet connectivity and voice service to all 5,870 homes, plus businesses, anchors, and other institutions in the nine community areas via a robust XPON fiber network, augmented by fixed wireless to reach the more remote households. These nine community areas include several Native American Tribes including: Round Valley Tribes and Reservation (Round Valley/Covelo), Cahto Tribe and Rancheria (Laytonville), Sherwood Valley Pomo Tribe and Rancheria (Willits), Potter Valley Tribe (Potter Valley), Pomo Tribe (Redwood Valley), Coyote Valley Band of Pomo Indians (Redwood Valley), Pinoleville Pomo Nation (Ukiah), Guidiville Rancheria (Ukiah) and the Hopland Band of Pomo Indians (Hopland).

Hunter has designed and will build and operate the network by providing all the necessary equipment to light the network. Our primary goal is to provide a reliable high-speed Internet network to the all potential users in the communities at a competitive price, encouraging economic development, providing excellent customer service and doing so it in a manner that minimizes risk.

Hunter's design calls for the FTTx XGS PON Technology network to utilize a passive optical network for residential and small business, and Active Ethernet for larger businesses, cell towers, and WISP's. Hunter will utilize this hybrid approach to create a state-of-the-art network designed with the future in mind. This do it right approach will take into consideration minimizing downtime caused by wildfires, future bandwidth needs, and future technological advancements.

Each of the nine community areas are planned to have either a hut or cabinet based upon size of the community; these locations will service as the aggregated data center where the last-mile distribution system where we plan to place fiber terminals, core and edge routing, and Optical Line Terminals (OLT) and where the infrastructure will be extend via fiber drops to connect the households.

For larger businesses and tower locations we will provision for either a dark fiber or lit service using traditional industry interconnection equipment (small router). Our intent is enable wireless carriers to build out their networks to further enhance voice and data connectivity to this rural and neglected area.

<u>Download</u> speed capabilities of proposed facilities:	The maximum residential service <u>Download</u> speeds customers may subscribe to are: 1000 Mbps.
<u>Upload</u> speed capabilities of proposed facilities:	The maximum residential service <u>Upload</u> speeds customers may subscribe to are: 1000 Mbps.

Preliminary indication of need for CEQA review:	Hunter has contacted the Commission's Energy Division CEQA section in advance of filing this application and has consulted with CEQA Staff regarding the process of developing and filing a Proponent's Environmental Assessment (PEA) or other CEQA documents. Hunter is aware of its responsibilities if this proposed project is not exempt from CEQA. Hunter anticipates that parts of the project will require CEQA review and other parts will not which will also be identified by CalTrans.
--	---

Benefits of Project

Resilience - By deploying fiber underground, as opposed to aerial, this Last-Mile Distribution System will be better protected against wildfires, other unforeseen disasters and outages.

Tribes - In addition to providing broadband access to 5,870 households this project would also be serving the needs Native American Tribes located within the project area including: Round Valley Tribes and Reservation (Round Valley/Covelo/Dos Rios), Cahto Tribe and Rancheria (Laytonville), Sherwood Valley Pomo Tribe and Rancheria (Willits), and Hopland Band of Pomo Indians (Hopland).

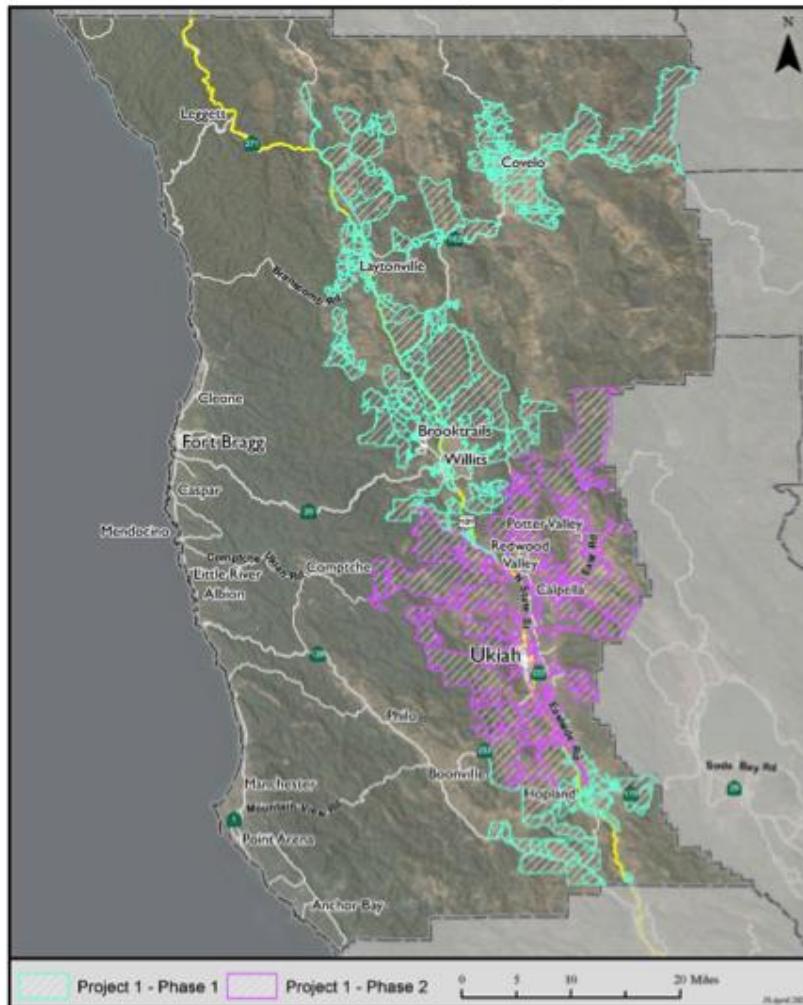

Low-Income - With a total weighted average median Household Income of \$46,552, this project is serving a population that is well below the \$51,500 CASF standard. According to official CPUC data this project serves 2,725, or 46.4% of the households are considered below 200% of Federal Poverty. This project provides broadband services to these qualified households at \$14.99 per month for 25 Mbps download and upload speeds.

No Service - Based on the official 2019 CPUC Data Availability and Mapping Report, there are no providers currently serving Round Valley/Covelo/Dos Rios with 970 targeted Non-Served households.

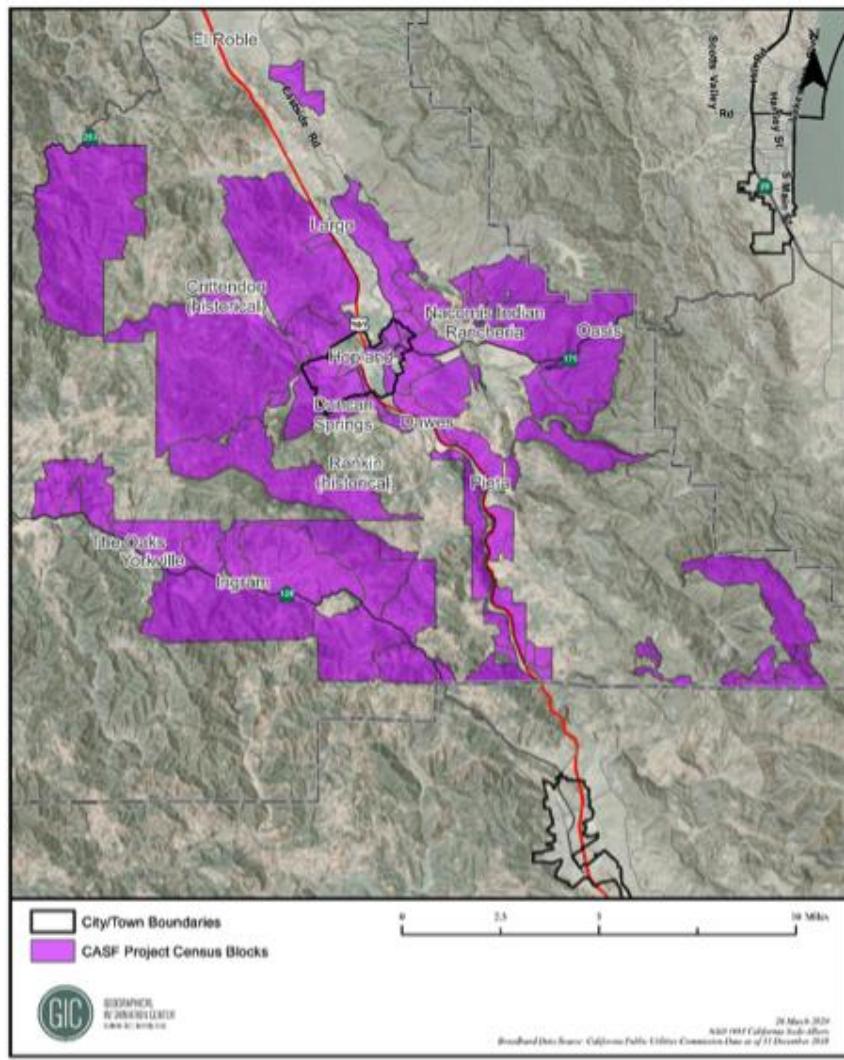

Closing the Digital Divide - Finally, this project makes a significant contribution to the NBNCBC region achieving the State's 98% access goal for all regions throughout the state.
